

SARAHAI Edge Computing

An Open Architecture Turn-Key Solution Reference

Edge AI TPU ML Accelerator

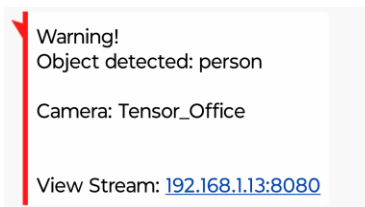

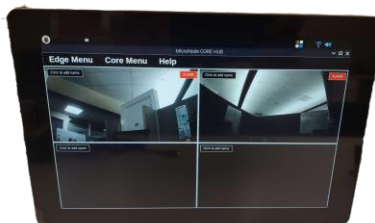

4 Hour Battery Bank Backup & AC Pwr

Electro Optical with Infrared

IPX7 Speaker and Microphone

Core Tablet Manages Edge AI

Real Time Object Alerts via Text Msg to Officers

Federated Edge AI Technology Shipping Now

AI Machine Vision Object Detection and Alerting in Only 15W

SARAHAI at the Edge is able to independently Detect and Alert stakeholders to Objects or Situations of Interest.

- Edge AI TPU ML Acceleration for Computer Vision Inference
- 1080P Day Night Vision
- 63200 mAh Battery Bank
- IPX7 Speaker and Microphone for Natural Language Processing Interactions

- A Federated Edge AI Solution where all of the processing happens at the Edge independent of Cloud or Data Center connectivity

- An open architecture provides deployment options

- Developed with USAF Technology U.S. Patents Nos. 9,696,404, and 11,308,384

Converge the Edge back into the SARAHAI Core platform to manage and monitor multiple Edge AI implementations.
